DETAILED ACTION

Priority

The amendment to the specification filed 2/17/04 must include the current status of the application, i.e. --now U.S. Patent number 6,689,089.--

Specification

The disclosure is objected to because of the following informalities:

Pages 1 and 3 refer to claims 1 or 6 and 1, 8 and 9, respectively. These claims are no longer pending in the application.

Appropriate correction is required.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the specification does not use the terminology atherectomy.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3763

Claims 11-12 and 14-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Taylor (USPN 6,001,112). Taylor discloses a atherectomy device that includes a catheter with a lumen (12), a distal element (22), a shaft (24), and a measurement device (131). See 14:26-49 and 15:8-22. The output of the measurement device can be any variety of tactile, auditory or visual. See 14:62+.

Allowable Subject Matter

Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
